SUMMARY

Junior Frontend Web Developer skilled in building responsive and dynamic web applications using React.js, Next.js and TypeScript. Demonstrated practical experience through freelance projects and participation in a hackathon, showcasing the ability to translate ideas into functional, user-focused interfaces. Eager to contribute to innovative teams and grow expertise in modern web development.

EXPERIENCE

Frontend Web Freelancer | Upwork

2025

- Built 3 landing pages for clients and their business using ReactJS and NextJS with over 17+ pages and advanced animation. The projects are the following:
 - Hisab Kitab (8 pages): <https://hisab-kitab-amber.vercel.app>
 - Yin Yang (1 Page): <https://ying-yang-mu.vercel.app>
 - Bot Pipes (8+ Pages): <https://botpipes.vercel.app>

PROJECTS

Intelligent Money Management

- A web application with openai API integration for smart transactions, accounts and budgeting creations with ReactJS and NextJS for frontend and Supabase for backend. (<https://money.neurocoder.work>)

Safety Pin

- Led in the development of a mobile-focused Progressive Web App developed in a 4-man team during the Blue Hacks 2025 Hackathon in Ateneo de Manila University.

Kalikasan Advocacy Campaign

- Built a web application aimed towards promoting awareness to environmental sustainability which garnered 30 participants. (<https://kalikasan-blog.firebaseio.com>)

The Villa Store

- A basic Ecommerce website built using Django framework. Aimed towards promoting and advertising local goods to the community during pandemic. (<https://thescicoder3000.pythonanywhere.com/>)
